Headmaster's Message

SPCS Families,

The month of May is flying by! It's hard to believe that there are only a couple of weeks of school remaining. Please make sure to refer to the school calendar as we end the school year.

I would like to extend another thank you to ALL for such an impressive and successful FUN RUN. Together we accomplished so much and I am so proud of our SPCS family.

This past Thursday we inducted our newest National Junior Honor Society members. Congratulations to all of these students and their families on this great accomplishment and thank you to our outgoing members for such a great year.

"Therefore, whether you eat or drink, or whatever you do, do all to the glory of God (1 Cor. 10:31). Let's finish strong!"

Have a blessed weekend!

Bobby Hunter

IN KIND

SUMMER TUTORING

MRS. HUNTER - ENTERING GRADES 1-4

MISS HANNON - ENTERING GRADES 4-8

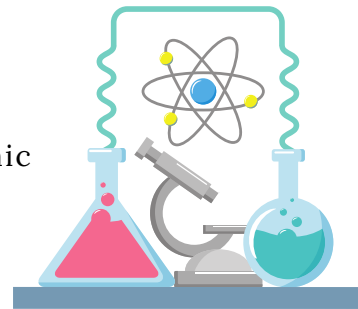

Kindergarten Goes Exploring

Kindergarteners were excited to ride the bus to Great Explorations for a field trip last week. They had fun interacting with their friends and exploring all it had to offer!

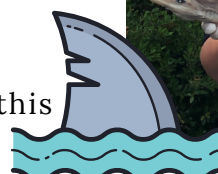

8th Grade Goes to MOSI

Our 8th graders experienced physics and chemistry in a fun, hands-on environment during their day at MOSI. Students saw chemical reactions demonstrated and worked in groups on thermal reactions as well as endothermic and exothermic reactions. Students worked with polymers and crystals and discussed chemical formulas for their experiments. Then, they had a chance to try out their CSI skills looking at fingerprints, blood samples, and evidence to decide 'who did it' and hone their forensic investigative skills.

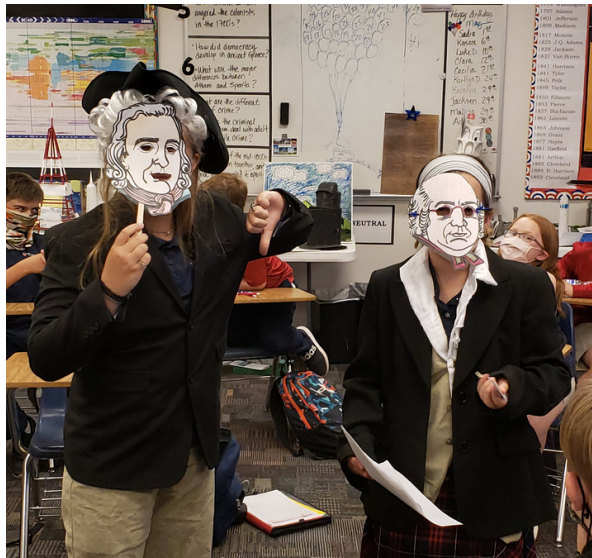

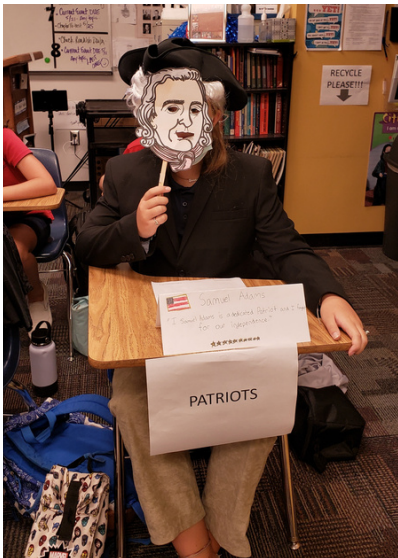

7th Grade Life Science

Our 7th graders have spent their school year exploring Life Science and the many aspects of the plants and animals God created. They have worked through several dissection labs culminating in their final dissection of a vertebrate with several functioning organ systems. The students worked in dissection teams to explore the complex systems of the dogfish shark and analyze their anatomical structures. We are proud of their hard work this year!

5th Grade Debate Panel Patriots vs. Loyalists

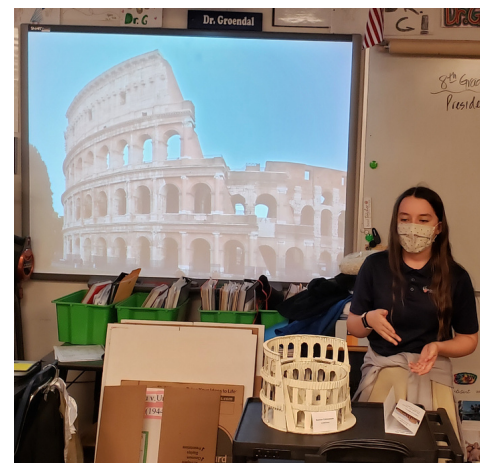

Fifth Grade students defended either the side of the patriots or the loyalists during the American Revolution. They had to work together to come up with an opening argument, rebuttals, and closing argument for why America should either break away or stay loyal to England. Great Job!

6th Grade Int'l Monument Presentations

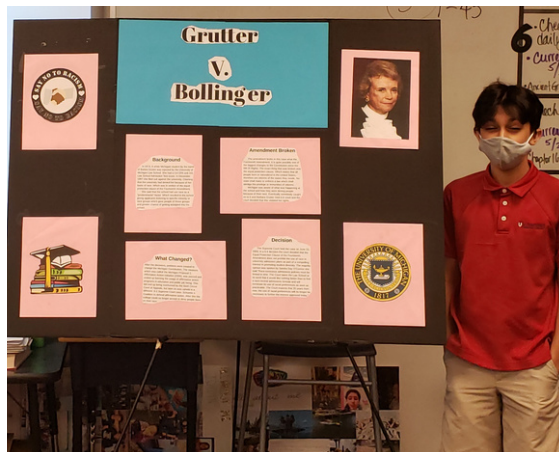

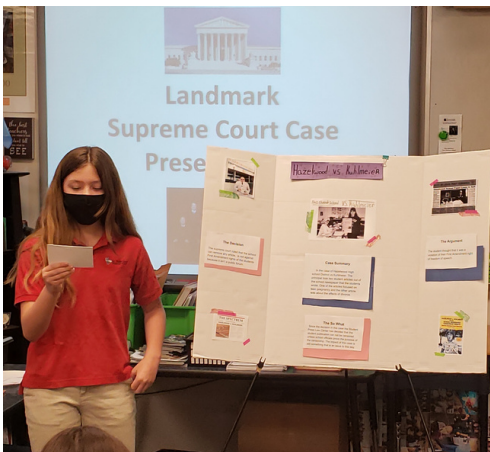

Sixth Grade students constructed replicas of International Monuments and shared their creations, as well as facts about the monument, with their classmates. Very creative!

7th Grade Supreme Court Case Presentations

Seventh Grade students researched landmark Supreme Court cases and shared their findings with their classmates. Court adjourned!

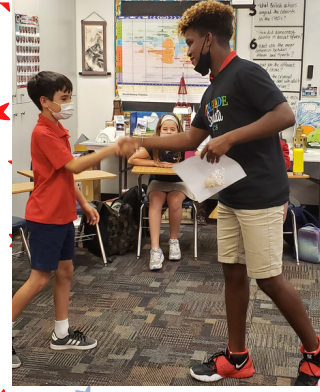

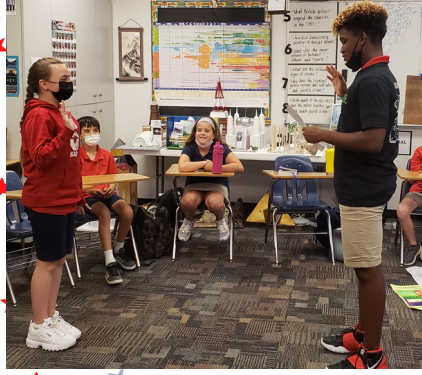

2021-2022 Student Government Elections

Upper Division students recently elected their 21/22 Student Government. Officers were sworn in and we look forward to a great year with them!

Chaplain- Bauer H.
Parliamentarian- Brooke D.
Treasurer- Luke H.
Secretary- Connor L.
Vice- President- Karis T.
President- Taj H.

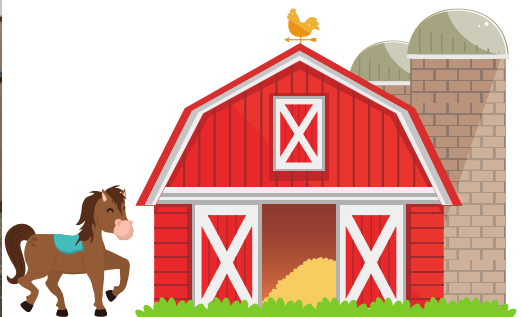

SSYRA Readers Rewarded

Students in Grades 1-4 that read all of the Sunshine State Young Reader books were rewarded with an afternoon of bowling, time with their friends, and a pizza and cupcake lunch! What Fun!

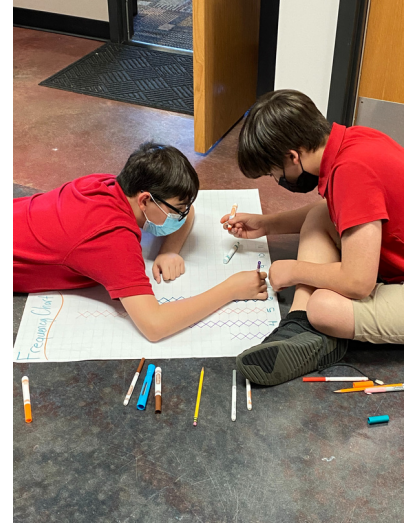

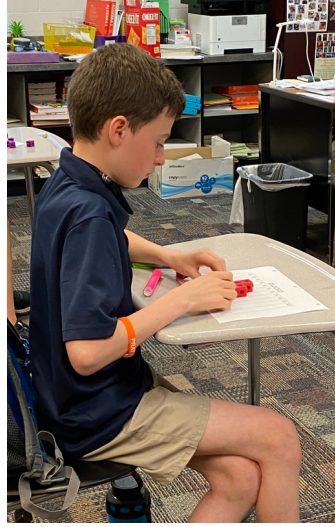

1st Grade Down On The Farm

First Grade students spent an afternoon at the farm recently! Their up-close and personal interactions with the animals was a special treat!

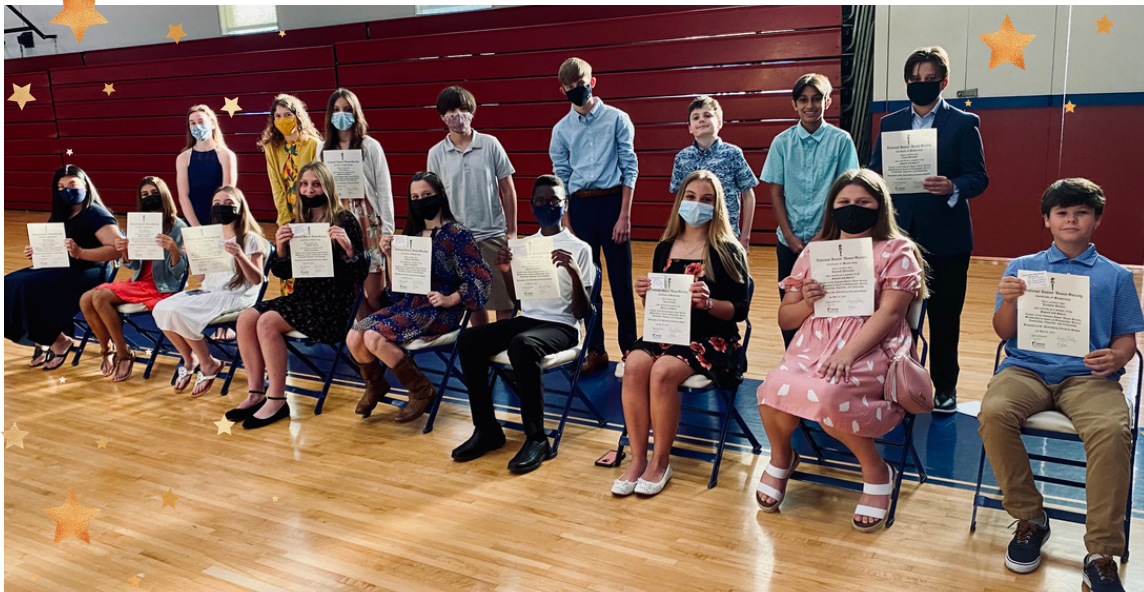

7th Grade Probability Lesson

Seventh Grade learned about theoretical and experimental probability by playing "Blocko". They created frequency charts and found the probability of rolling each sum of two dice.

New NJHS Members Inducted

Congratulations!

Kindergarten Dinosaur Adventure

Mrs. Patterson's class traveled back in time to learn about dinosaurs! It was a learning adventure!

UPPER DIVISION SCIENCE CLASS

Upper Division students are wrapping up their projects in 5th-8th grades. The seventh graders are building 3D models of DNA molecules. At the same time, fifth graders are building simple machines to demonstrate their understanding of physics. And our soon-to-be graduates, the eighth graders, are creating their own science experiments in small groups for presentation. Amazing work scholars!
